

Organization for Defending Victims of Violence

Item 7: General Debate

Save the Living Gaza Children from Ending in the Graveyard

In a five-month period much more children have been killed in Gaza than any other conflict in the modern world history. All heinous crimes continue in the region under the world's gaze, more children are dying in silence from dehydration and malnutrition while the man-made catastrophe can be brought to a halt by political will.

The children are starving to death. The world has witnessed inhuman tragedies in Gaza, unprecedented in modern history while the world powers fall accomplice to the atrocity crimes committed in the enclave, including the "crimes against humanity", "war crimes" and "genocide".

Mr. President,

Urgent action is needed to address the crisis of humanity in Gaza.

We call for urgent, Humanitarian Aid; Medical Care; Protection of Children from Violence, Hunger and death in the enclave.

We call on the international community to fortify efforts to bring peace to Gaza and the region, before it is too late.

We call on the States who are accomplice to international crimes committed in Gaza to consider the legal accountability associated with their inhuman policies.
